♠Appointed May 4, 1914, in place of James P. Sawyer, deceased.

△Appointed February 19, 1923, in place of Geo. H. Baker, deceased.

()Appointed September 2, 1901, in place of George T. Chaffee, resigned. Resigned September 5, 1910.

†Appointed April 3, 1911, in place of Charles W. Ward, resigned. Elected March 7, 1911.

Report of the Mayor

To the Citizens of Rutland:

Only nine months of transactions reported in this report were under the control of the present administration. As all of our officials are elected in March, and the appointees take office April 1st, would it not be advisable to either have our business year end April 1st, or have our elections in November, and take office when our business year begins January 1st.

The Mayor has maintained an office in City Hall the past nine months and it has been a great convenience for all the city officials who have to get the mayor's signature to bonds, warrants, etc.

Public Works Department: While it is true that the costs in this department have been materially increased owing to the Federal requirements when aid is received, when the final totals are available they will show that we have been very well paid for every dollar we have expended.

Taking the PWA projects voted in 1933, the Library and the large sewers we have received Federal grants of \$74,949 and have due us \$10,638, a total of \$85,587. In addition to that the City had received from the VERA and WPA administration from January 4th to November 2nd of this year \$98,353.76. This added to our grants received and due totals \$183,940. We have several thousand dollars due from WPA for November and December work. These large amounts received during these past two years have undoubtedly greatly reduced our Charity costs.

Sewers: Moon Brook, Mussey Brook, Main Area No. 1, Main Area No. 2, and West Area sewers are completed, and Rutland now has its drainage areas quite well cared for.

Taking advantage of the WPA which pays the entire labor costs, several small short sewers are being built. If this is continued during this year there will be very few streets lacking sewers, and it should materially reduce the costs of sewer construction for many years to come. Also we cannot estimate the great value they will be to the health of the community.

The Library Building: After many years of waiting and being once turned down, Rutland has a beautiful building in which to house the Library, and this at a very reasonable cost. The City also has in this building two rooms that can be used for offices, and a fine large room that can be used for art exhibitions, stamp club exhibits, and any other cultural exhibits. The room is finely lighted and should be reserved for such purposes on the payment of a small maintenance charge.

Police Department: Chief of Police William Fox has done very well with the police force available. With the knowledge we

now have of its members, and its needs, it will be possible in the near future to greatly improve it, we hope.

Parking and Traffic Laws: All attempts to put into effect reasonable warnings, and minor penalties for violating parking ordinances having failed, owing to the Court decision, our City Attorney has been hard at work getting out ordinances and regulations that if approved by the City Council and enforced by the police should stop all complaints, except from violators of same. Seriously speaking—all cities have this problem. Is the "paying meter" the solution?

Taxes: Again we would call attention to the fact that outside of the Charities we are operating within our budget. Also, the budget proposed by the Mayor for 1936 was approximately \$75,000 less than that proposed in December 1934 for 1935, and the following statement from Commissioner of Public Works Tracy will give one of the reasons for hoping we can continue to hope to remain within our budget, outside of Charities.

"The grand total cost of the Public Works for 1932-34 averaged \$61,260.47, or about 50% of the previous five year average. The year 1935 will see still further reductions to a total of about \$55,040, or about 45% of the previous total."

"The estimated expenses for the year 1936 vary in some of the items and departments, but the total is substantially below the 1932-34 figures, as are the 1935 costs."

Including, and since 1931 there has been a deficit at the end of each year for five years, all charged to the Charity Department. Since 1931, beginning in 1932 while charity costs were mounting, the cost in the Public Works have decreased more than 50%. The deficit caused by the cost in Charities has been paid by the issue of bonds in plain defiance and violation of the State Law that provides that a deficit this year shall be paid by assessing the ensuing year a tax of 5%, or such multiples of 5% as is necessary to provide for the deficit, in addition to the tax provided by law. We thus assess a tax of just enough to care for this "abnormal" deficit because it is plain to everyone that our charity costs are abnormal. With our charity costs normal our present tax would be sufficient. Under the deficit law we pay the same amount in taxes we would pay if our tax rate was high enough to avoid a deficit, only we pay it one year later. Where is the disadvantage?

If our charter had been amended to allow us to assess a tax of \$4.25, and if that amount had been sufficient to meet our charity costs, and the depression suddenly ended, and our charity costs had dropped so our present tax rate would have been ample for the City's needs, would our Board of Aldermen lowered the tax rate to \$3.55, where it now is, or would they have kept it at the limit?

The law compelling town officials to take care of expenses by taxes instead of by bonds is a good law, a wise law, it focuses the

taxpayer's attention on the town's expenses, and those controlling them, and makes the voters realize that it makes a difference whom they elect to office.

Air Port: All work on this project ceased when the VERA ended. All labor costs were paid by that Administration. Until we have a definite detailed plan, including specifications and costs, approved by the proper authorities, I would not think it advisable to even consider doing anything on this project. Of course if the Federal Government wish to improve it, erect runways and a hangar without expense to the city we should ascertain whether the voters approve the purchase of such portions of the lands, under lease and option, as would be needed, and even then the cost of operation and maintenance should be first ascertained.

General Affairs: I wish to call your attention to the fact that all departments of the City operated within their budget, except salaries, which should not be counted as not so operating, owing to the new provisions of paying the City Attorney a fixed salary instead of out of the general fund, and during the past few months paying for a much needed secretary in the Mayor's office—and the Great Exception that exceeded its budget.

Charities: This department was supervised by three different Overseers during the past year. The report of the present Overseer will cover as well as it is possible the year's operation.

Several thousands of dollars of bills due from previous years were paid during the year, and so far as has appeared to date the City owes very little if anything outside of small accounts the City Attorney is adjusting with other town authorities. These are more than offset by amounts we claim due the city from other towns in the state for support of persons chargeable to those towns.

Even with the large amounts received from the Federal Government the costs of charities has grown to alarming proportions. The completion of the trunk line sewers throwing over 200 men out of employment paying them a minimum of \$15.00 a week, the sudden closing down of the VERA, the strike of the marble workers, the paying of old debts, all jumped the costs up. During the past five months many changes in handling this department have been put into operation and the beneficial effects to the city finances are already being felt. More details of these operations will be given you in the next few weeks.

Fire Department: We have nothing but praise for this department. It is well and economically managed, very efficient. Rutland has reason to be proud of it. Undoubtedly it would be wise to provide it with a new combination truck.

Credit of the City: I doubt if the credit of the City has ever been any better than it now is despite our charity costs.

This was proved, I believe, by bankers bidding in our bond issue (to finance our deficit) of (\$83,000) eighty-three thousand dollars at $2\frac{1}{4}\%$ interest plus a premium that makes our annual interest $2\frac{1}{10}\%$.

OUR LATE MAYOR A. W. PERKINS

Our City sustained a great loss in the death of my predecessor, a man loved by his employees, esteemed by all who knew him. He gave unsparingly of his time, and generously of his money to promote the City's interests and welfare along lines he judged best.

I thank the heads of the departments, and all of the employees who have co-operated with me in these trying times.

Respectfully submitted,

HENRY H. BRANCHAUD,

Mayor.

Report of City Treasurer

To the Honorable City Council, City of Rutland, Vermont:

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1935.

RECEIPTS

*State, State School, State Highway, County, Farm Bureau Asso. Assessment.

The foregoing is a statement of the gross expenses of the departments mentioned for the years 1924-1935 inclusive. Payments were made from funds received from tax levies, bonds, water rents, gifts, sundry receipts and by transfer of water department funds to the sewer account as follows: 1924, \$6,000; 1925, \$5,000; 1932, \$10,000; 1933, \$7,345; 1934, \$7,000; 1935, \$6,500, and in 1935, from the special water sinking fund to the general account \$14,412.12 and to the street account \$3,000. The statement also includes such extraordinary expenditures as payments for the Dana school building repairs, Meldon school building repairs, River street bridge, Dorr bridge, Mendon watershed, trucks, tractor, fire truck, fire alarm telegraph, etc., but does not include expenditures for permanent highways, widening of Grove street, State Armory, High School, sewers and sidewalks for the payment of which bonds were issued.

Reference is made to the reports of the commissioner of public works for 1933-5 and to the reports of the city treasurer for 1933 and 1934 for information about government aid in the department of public works and the department of charities and corrections.

Report of Commissioner of Public Works FOR THE YEAR 1935

The Honorable City Council,
Rutland, Vermont.
Gentlemen:

The construction and maintenance activities of the Department of Public Works and associated Federal Relief Projects together with their detailed costs are shown in this annual report for the year 1935.

Each division of the department was able to complete its year's work within the available funds and have balances remaining. At the end of the year there were no outstanding bills.

The financial statement for the period January 1st to December 1st, 1935, including inter department charges and credits, is as follows:

Department	Receipts	Expenditures	Balance
Street.....	\$45,450 08	\$45,389 96	\$60 12
Sewer.....	7,087 26	7,080 98	6 28
Sidewalk.....	1,339 37	1,274 52	64 85
General.....	4,657 00	4,609 21	47 79
Water.....	42,917 53	40,253 65	2,663 88
VERA—WPA.....	9,728 86	9,723 80	5 06
Special Welfare Work Relief Fund.....	10,000 00	9,991 76	8 24

The Special Welfare Department Work Relief Fund is not a part of the finances of the Public Works Department. It was expended in the form of wages to City residents instead of giving it out as direct relief. The work performed consisted chiefly of the construction of small sewers that is described in detail in the Sewer Department report. Part of this crew worked on bituminous street surfacing during June. The expenditure of this fund covered the period of January to the first week of July. Between 45 and 50 men were employed during this period.

The VERA, WPA account purchased materials, tools and supplies and paid for equipment on the many VERA and WPA projects for which the Federal government paid wages to relief laborers.

All other accounts shown above are for regular City maintenance and construction.

DEPARTMENT COST COMPARISONS

STREET

Average 1927-1931 \$69,238.60

Average 1932-1934 \$45,757.55

1934 \$52,394.66

1935 \$45,389.96

SEWER

Average 1927-1931 \$23,340.82

Average 1932-1934 \$8,607.72

1934 \$8,060.30 Exclusive of VERA material

1935 \$7,080.98

GENERAL

Average 1927-1931 \$16,798.62

Average 1932-1934 \$5,776.33

1934 \$5,928.97

1935 \$4,609.21

SIDEWALK

Average 1927-1931 \$13,252.65

Average 1932-1934 \$1,118.87

1934 \$1,244.38

1935 \$1,274.52

WATER

Average 1927-1931 \$62,679.24

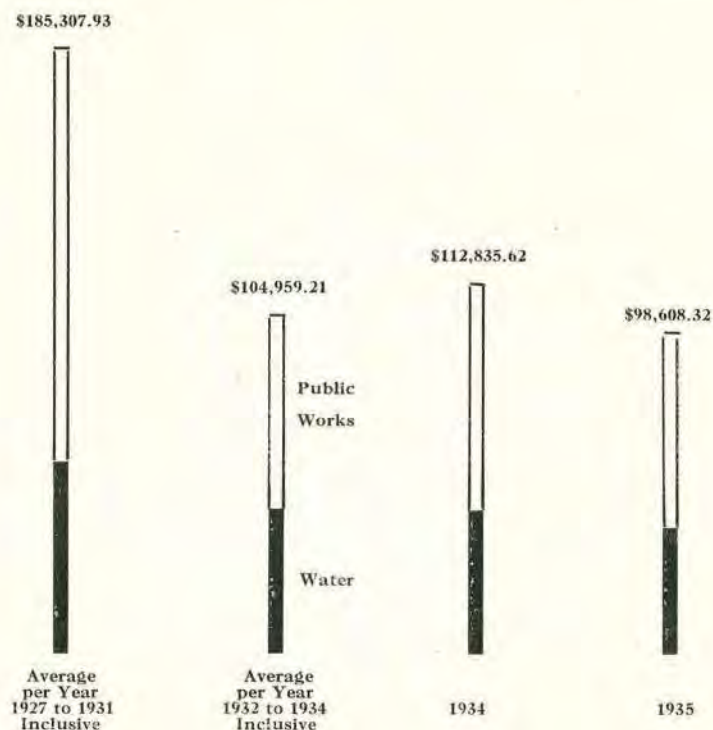

Average 1932-1934 \$43,698.74

1934 \$45,207.31

1935 \$40,253.65

COMPARISON OF TOTAL COSTS IN DEPARTMENT OF PUBLIC WORKS

Regular departmental construction and maintenance is shown in this comparison. Expenditures and bond issues for unemployment relief are not included as they did not occur in all the years. These various relief expenditures are tabulated later in the report. The departments shown in the comparisons on this page are Public Works, which includes Streets, Sewers, Sidewalks and General; and the Water Department which is shown by different shading because its income is derived from water rents while Public Works is supported by taxes.

COST COMPARISONS

Expenditures of all departments compared with last year's.

Department	1934	1935	1935 % of 1934
Street.....	\$52,541 38	\$45,389 96	86½
Sewer.....	*11,803 35	7,080 98	59½
Sidewalk.....	1,244 38	1,274 52	102½
General.....	5,928 97	4,609 21	78
Water.....	45,207 31	40,253 65	89
VERA, WPA material.....	28,154 70	9,723 80	34½
Total.....	\$144,880 09	\$108,332 12	

*Includes materials and labor sold to CWA and VERA during 1934.

The total cost during 1935 of all of the above departments was 75% of the cost in 1934, which is a reduction of 25% in a year. The 1935 cost for the total of the above departments is only 62% of the total costs prior to 1932, which did not include a VERA material item. The year 1932 was the beginning of reduced budgeting and is therefore taken as a dividing point for comparisons.

STREET DEPARTMENT

The practice of doing as much permanent street work as possible with the State Aid funds and matching City money was repeated this year. The concrete pavement on Strongs Avenue was widened six feet with standard reinforced concrete from Madison Street to South Main Street. A four foot shoulder and gutter with tar surface was constructed in addition giving ten feet more road width than existed formerly. This relieves a serious traffic congestion that has existed for several years on a main highway leading to the business section.

This project cost \$3,675.12 of which Federal WPA funds paid \$1,002.36. State Aid will pay \$1,574.04 leaving the net cost to the City approximately \$1,098.72 for 1,373 square yards of concrete and about 915 square yards of tar shoulder and gutter.

The most important maintenance item, which may also be partly classed as improvement, is the surface treatment with liquid tar and asphalt. These materials were spread on 122 streets of the city, which is three more than last year. A total square yardage of 337,031 was covered, which is 17% more than the 289,058 square yards done in 1934. The quantity of tar and asphalt used, however, was slightly less than in 1934, the drop being from 83,417 gallons to 82,978. This indicates that the surface of the streets is improving and the rate of application was reduced from 0.305 gallons per square yard to 0.248.

In addition to an increase in square yards treated there was an increase in the total lineal feet of streets improved from 152,620 feet in 1934 to 159,855 in 1935. This represents a mileage of 18 foot road of 27.37 miles in 1934 and 31.94 miles in 1935. Transforming this increase of work done with slightly less bituminous material into terms of units of work would be equivalent to saying that the cost per unit of surface treatment in 1935 was about 86% of the 1934 cost.

The labor for handling the sand cover was furnished by the City Relief group working under part of the \$10,000 fund during June and the first week of July. When this group was disbanded the bulk of the surface treatment was yet to be done. It would not have been possible under the budget limitations to complete the proposed work by the usual methods. This department is indebted to the State Highway Department for the loan of sand spreading equipment to help carry out the program laid out. For the first time, washed sand was used for covering part of the bituminous surface. The superior results warranted the change. By thus preventing the picking up of fresh tar and asphalt by automobile tires, the amount of patching required during the following season is reduced. This covering used 1,960½ cubic yards of washed sand and 547 cubic yards of bank sand.

The gravel work consisted of maintaining roads with 750 cubic yards of gravel from the West Rutland pit. The work was scattered and included many small jobs on most of the outlying streets. Streets in these sections where traffic is comparatively light were treated with 9,500 pounds of calcium chloride which acts as a dust layer and preserves the road surface.

The method of cold patching with a mixture of fine gravel and tar, developed in 1933 by this department, was continued. The decrease in cost of patching, due to the improvement in quality of surface treatment, is shown by the quantities of mixed cold patch used. In 1935, 169 cubic yards was sufficient, while 315 cubic yards were required in 1934 and 411 cubic yards in 1933. This cost reduction was predicted in the 1934 report. The comparative expenditures were \$1,058.73 in 1935, \$2,269.77 in 1934 and \$3,061.72 in 1933. Prior to 1932 the annual cost of this item averaged \$3,413. This cost has now been cut to 31% of the former average.

Other maintenance items that have been reduced as a result of the improved surface treatment materials and methods, are:

	Average for 5 years prior to 1933	1934	1935
Grading with road machine.....	\$4,473 12	\$1,193 50	\$947 11
Scarifying and rolling streets.....	960 87	508 71	468 82
Total.....	\$5,433 99	\$1,702 21	\$1,415 93

Our present costs are 26½% of the former average.

The improvement of gutters on hill streets by shaping and treating with tar or asphalt, which has been done to overcome the expense and inconvenience of gutter washouts during heavy rains, is already returning dividends in the reduced cost of the treatment itself as well as overcoming the washout trouble at the same time. In 1935 this work cost \$996.47 as compared with \$2,074.37 in 1934. The work required 3,960 gallons of tar and asphalt.

A 1935 innovation in street improvement was the raising of uneven and sunken concrete pavement slabs. Two locations, Strong's Avenue and Library Avenue at Grove Street, were leveled. The cost, including the development of the special equipment and method of procedure, was only \$155.79.

The snow plowing and removal and the sanding of icy roads and walks also cost less than in 1934. This item, however, depends on the snowfall and number of storms. During 1935, four major storms cost \$3,226.89, an average of \$806.72 each, while in 1934 five storms cost \$4,344.16, an average of \$868.83. Modern traffic requirements have greatly increased the amount of sanding of ice during recent years. In 1934, 561 cubic yards were used and 1935 required 401 cubic yards. Improvements in plowing equipment have placed the department in a position to handle snow with more speed after storms.

The cleaning of downtown pavements, removal of dirt from catch basins, flushing of pavements with water in the business section, and the scraping and cleaning of gutters throughout the city cost \$5,649.60 which is less than the 1934 expenditure of \$5,886.09. The horse-drawn wagon, always a familiar sight while engaged in a portion of this cleaning, is no longer a unit of the department. The work is now done with a motor truck.

All trucks, property and equipment have been carefully repaired and maintained. This is especially necessary as costly replacements are impossible during these years of necessarily reduced budgets. All machines, though quite old, are serviceable and operating economically.

Some cooperative street improvement work was done with VERA and WPA. The cost to this department was only \$84.17.

Ripley Bridge was painted with rust-resisting zinc and Door Bridge received a coat of aluminum. The greatly improved night visibility should reduce traffic hazards. A new plank floor was laid in '76 Bridge, the last of our covered wooden bridges.

On State Street Federal-aid highway funds built a new bridge, a steel I-beam structure with concrete pavement, walks and ornamental handrails, and widened and curbed the roadway from Merchants Row to Columbian Avenue. The car track area was also paved with concrete.

Federal funds also provided for the resurfacing and curbing of North and South Main Streets from Kendall Avenue to Madison Street. This work will be completed in 1936.

SEWER DEPARTMENT

The major part of new sewer construction was performed by PWA, VERA, WPA and Welfare Department Relief. The Sewer Department supplied materials for the jobs carried on by City Relief labor. The men were paid from the \$10,000 Welfare Department fund appropriated for this purpose.

Catch Basins and manholes were maintained by the Sewer Department which also built four new catch basins to improve street drainage.

Sewer maintenance included the removal of plugs and stoppages from main pipes, the repairing and relaying of broken sewers and cleaning and testing main sewers where needed. This work cost \$1,558.22 as compared with \$2,199.33 in 1934 and \$3,147.90 in 1933.

Miscellaneous labor and material costs dropped to a new low of \$260.15.

The jobs for which the City Relief fund of \$10,000.00 paid the labor and the Sewer Department furnished the material were on the following streets:

Edson Street; 100 feet of 8-inch pipe on the west side from Willow Street northerly.

Engrem Avenue; an 8-inch connection between the East Street sewer and the sewer crossing Engrem Avenue west of East Street was made with 154 feet of pipe.

Franklin Street; 344 feet of 8-inch pipe was laid near Cherry Street.

Granger Street; 262 feet of 8-inch pipe was laid south of Franklin Street.

Howard Avenue; the 8-inch sewer was extended easterly 98 feet.

Lafayette Street; a new 10-inch pipe was laid from Killington Avenue to a point halfway between Washington and East Center Street.

Meadow Street; from the old Trunk Sewer No. 1, 392 feet of 10-inch pipe was laid to Convent Avenue, and from there southerly 432 feet of 8-inch pipe was installed.

The Ross Street 8-inch sewer was extended 50 feet near the north end.

The total cost of both the regular Sewer Department repairs, maintenance and new work and the furnishing of materials for the City Relief jobs was \$7,080.98 of which \$4,351.39 was paid as wages.

SIDEWALK DEPARTMENT

The maintenance of tar and gravel walks, insofar as funds permit, was done during 1935 as in the previous two years. Cold patch, similar to that used on roads, has thus kept walks in a safe condition during the years when a large program of new construction has been impossible.

A WPA program of concrete sidewalk building, by which the Federal government pays the labor and the cost of materials is divided between property assessments and bond issue funds, has been started on State Street. In 1936, as soon as weather permits, there will be many streets improved in this way.

The regular Sidewalk Department built a new concrete walk on Merchants Row and West Street for which the lessee of the Quinn Block paid one-half the cost.

GENERAL DEPARTMENT

This department, with Federal funds building new structures that used to be paid for by the City, was able to perform the necessary work within its budget. The new State Street bridge has already been described in the Street report.

The repairs to bridges, culverts and guardrails were made as needed. The cost was \$285.65 which is lower than in any former year.

The City Dump on Gleason Road was in charge of a caretaker during the entire year. Main Street Park was cared for from Spring until the first snow. Dangerous limbs were removed from trees wherever required and a few trees had to be cut down as a safety precaution.

A WPA project that is underway will improve the city trees greatly. All trees within the street are being trimmed on federal highways, selected State highways and principal city streets.

This year there were many unusual jobs in the General Department. The library books were moved from Church Street to the new Library building. The memorial monument, formerly located at the corner of Main and West Streets, was moved to a new base on the Armory lawn. Ice jams in East Creek had to be dynamited.

All City activities in this department cost \$4,609.21 during 1935 while in 1934 the expense was \$5,928.97. Our present cost is only 27½% of the average cost prior to 1932.

WATER DEPARTMENT

The work in this department was supervised by Edgar S. Beardsley, who has been in charge since 1926.

Although there was considerable sub-zero weather during early 1935 the cost of thawing was only \$258.19, which represented a considerable saving from the 1934 figure of \$3,191.30 with its incidental repair expenses which raised the expense to about \$7,000.00.

The regular new construction of the department continued to follow the recommendations of the New England Insurance Exchange which call for the replacement of inadequate mains.

On Fairview Avenue 483½ feet of 6-inch pipe connected Oak Street and Crescent and eliminated two dead ends. One 6-inch valve was installed on the new line.

The 6-inch main on Howard Avenue was extended 72 feet to accommodate two new houses.

On Lincoln Avenue the old 3 and 4-inch pipes were replaced with 1,703 feet of 6-inch. This main gave trouble in 1934 after freezing up. With the new pipe and 8 valves the street is now properly serviced.

The old inadequate pipe on Moulthrop Avenue was replaced by 275 feet of 6-inch pipe to give a sufficient flow to the milk station which is a large consumer of water.

The portion of North Church Street between North Street and Vernon Street was connected up with 1,262 feet of 6-inch main and 2 valves. Two new houses have been built on this street.

A project was under way on North Main Street north of Vernon Street at the close of the year. 8-inch main 669 feet long with 1 valve had been laid. The work will continue in 1936. When

this North Main Street main is completed the north end of the city will have proper fire protection.

Three hundred and fifteen feet of 6-inch pipe with a valve at Jackson Avenue was laid on Avenue D. On Aloedia Street a small pipe was extended 378 feet to service a new house.

The Water Department furnished pipe and skilled labor to install new mains on Butterfly Avenue and Curtis Avenue which were VERA and WPA projects. On Butterfly Avenue 240 feet of 6-inch pipe and 218 feet of 3/4-inch pipe with one 6-inch valve was laid north of Killington Avenue.

The extension of the 6-inch water main on Curtis Avenue east of Mussey Street with 948 feet and an additional 298 feet of 4-inch pipe was underway at the end of the year. A valve was installed on this street.

The cost of this new work was \$12,895.36. A total of 6,643 feet of new and larger pipe was laid during the year. Twenty-one valves were set on these lines, making the total number in service 1,121.

New hydrants were installed at six locations bringing the total number now in service to 311. During the past eleven years the number of hydrants has been increased 41% which, with proper consideration given to the new mains and enlargements, shows that the fire protection facilities have been greatly improved.

There were 30 new services installed showing that building operations are on the upward trend again.

SERVICES INSTALLED

1929		102
1930	41	
1931	27	
1932	21	
1933	18	
1934	20	
1935	30	

These new services were charged against the various properties.

Service repairs, paid for by the City, cost \$4,023.18 which was a substantial reduction from the 1934 figure of \$6,065.64. Similar reductions were shown in other repair and maintenance items because of the smaller number of freeze-ups.

Main repairs dropped from \$2,002.33 in 1934 to \$591.76 in 1935; hydrant repairs from \$3,069.31 to \$1,748.57; meter maintenance from \$853.04 to \$450.34, and other smaller items in proportion.

These decreased costs made it possible to make more improvements at the Reservoir and Water Works Head then for many years. The main reservoir was thoroughly cleaned and scraped to gravel bottom early in the summer. All trees that shed leaves into the reservoir were removed to avoid this nuisance and allow the growth of protective evergreen trees. These improvements, according to the City Health Officer, reduced the number of complaints about water quality to a minimum for the remainder of the year.

The custom of setting out small pines and spruces on the watershed in Mendon was continued with the addition of 25,000 transplants.

The quantity of water used in 1935 was slightly less than during 1934 when an enormous amount ran to prevent service freeze-ups. The consumption of water, however, greatly exceeds 1933 and former years.

Cordwood was cut in Mendon by City residents for their own use, by the City Welfare Department and by VERA and WPA for use by the Charity Department.

The entire work program of the Water Department cost \$40,253.65 of which \$21,501.12 was paid out for labor and wages.

VERMONT EMERGENCY RELIEF ADMINISTRATION
AND

WORKS PROGRESS ADMINISTRATION

The huge program of Federal Relief of which these administrations have been a major portion continued to supply work for three hundred men under the Vermont Emergency Relief Administration as was the case at the close of 1934 until July of this year when it was discontinued and replaced by the new Works Progress Administration which is quite similar to VERA and carries on projects of a similar nature. The number of men employed by VERA varied from 289 to 333.

These divisions of relief pay the total labor cost while the City pays for materials, tools and equipment, and are not to be confused with the Federal Administration of Public Works, better known as PWA, from which the City will receive 30% of the cost of labor and materials on the several trunk sewer projects.

The quota of men on WPA at the close of 1935 was 420. There was some lost time during July, August and September for laborers while VERA was drawing to a close and WPA was beginning. During this period the quota of men assigned by the Federal government was as low as 200 for a time.

The total costs and proportionate shares of expense under VERA and WPA are as follows:

	Wages paid by Federal Government	City expense for materials, equipment	Total
VERA.....	\$80,959 31	\$7,616 56	\$88,575 87
WPA.....	46,079 07	2,107 24	48,186 31
Total.....	\$127,038 38	\$9,723 80	\$136,762 18

The City's share of the cost of this work program for 1935 was slightly over 7% of the total.

DESCRIPTION OF PROJECTS

AIRPORT. About two-thirds of the work of developing the field at the south end of the city for an airport was done during 1934. The grading and filling was continued in 1935 until VERA stopped in July. At that time, all the work planned in the original estimate was completed. This 1935 work consisted chiefly of filling low spots and smoothing the ground surface to an even grade that drains to the west. The filling was contributed by Arthur W. Perkins.

BUTTERFLY AVENUE. This street which was developed in recent years was provided with an 8-inch sewer draining into the Killington Avenue main and a water main with a hydrant at the corner of Butterfly and Killington.

CREEK ROAD. A sewer from the south line of the city to Dorr Bridge, a distance of 5,250 feet, was partially completed under VERA and finished under WPA. The size varies from 8 inch at the south end to 12 inch at the outlet near the bridge. An 8-inch sewer pipe from Ripley Bridge east was under construction at the close of the year.

CURTIS AVENUE. Two projects have been constructed on this street. VERA graded the street from the hill east of Mussey Street to the corner of Stratton Road. Material cut from the hill where the road was widened was used to raise the grade and widen the road across the swampy section. A huge rock was removed from the corner of Stratton Road and the banks were cut back. A sewer and water main installation is being made by WPA. The sewer extends from the top of the hill east of Mussey Street down to the Mussey Brook Sewer. The water line required is shorter as a 6-inch main was in place for part of this distance.

CAMPBELL ROAD. The Campbell Road grading project, underway in 1934, was completed.

EAST CREEK. The channel of this creek was straightened, dredged, cleaned and the banks rip-rapped with the excavated material. This work, part of which was done in 1934, extended from Crescent Street down to below West Street.

GARDENS. During the summer the supervision of garden projects was sponsored by VERA.

GLEASON ROAD. The cutting of the high bank on the west side of this street near Woodstock Avenue included the moving of nearly 10,000 cubic yards of earth and stone. This was used for filling on the low side. This street is now ready for the construction of a surface.

HARRINGTON AVENUE. The relay of the old sewer which had caused considerable trouble was done from the Moon Brook Sewer to Ross Street.

JACKSON AVENUE. The sewer which was started in 1934 was continued to Stratton Road and extended far enough to service the houses on Stratton Road that were formerly without sewers.

MENDON CORDWOOD. A project was started during the early summer to cut cordwood for use as fuel by the Charity Dept. This was suspended when VERA was discontinued during July and was reorganized under WPA in December. This will be continued throughout the winter.

MENDON SURVEY. A survey of the vicinity of Mendon Brook at the suggested reservoir sites was partly a VERA project.

POOR FARM. The extensive painting, heating and plumbing improvements at the Farm which were started in 1934 were completed. In addition, a barn destroyed by fire was razed.

REFORMATORY. A large program of improving the grounds and buildings at the Women's Reformatory was started by VERA and continued by WPA. The grounds are being landscaped and graded and the buildings are being painted and some structural changes are being made. All material for this project is paid for by the State of Vermont.

ROAD IMPROVEMENTS. An important WPA project is the widening, grading, straightening and bank trimming on streets in the outlying sections. Streets already worked are Jackson Avenue and Stratton Road.

SCHOOL GROUNDS. The grading of the yards at Park Street, Dana and Lincoln schools has improved the play areas as well as resulting in better appearance.

SIDEWALKS. An extensive program of concrete walk construction was started late in the season and will be continued as soon as the weather moderates in 1936. Under this system WPA pays the labor and material cost is divided between property assessments and bond issue funds.

STRONGS AVENUE. This pavement widening project from Madison Street to South Main Street has been described in the Street Department report. The labor was paid by WPA.

SWIMMING POOL. The interior of the pool was painted white before the 1935 season.

TREE TRIMMING. The pruning of trees and the performance of necessary surgery on all main highway routes was started by VERA and was resumed by WPA.

110 WALES STREET. The improvement of the interior of this building for use as a VERA office was started but soon abandoned when other arrangements were made.

PWA

FEDERAL EMERGENCY ADMINISTRATION OF
PUBLIC WORKS

This is the division of Federal Aid under which the several trunk sewer projects were carried on in this City. Bond issues provided for the City's share of the cost and the Federal government pays 30 percent of the labor and material total. The Federal share is not on hand in advance, but the City financed the proj-

ects and was reimbursed at intervals when requests were made. All these PWA projects are finished and final Federal grant payments are expected in early 1936.

All projects, which include Moon Brook Sewer, Mussey Brook Sewer, Main Area No. 1 Sewer, Main Area No. 2 Sewer and West Area Sewer will have substantial balances in the account when final settlement is made.

DOCKET 1330, MOON BROOK SEWER

This project was nearly finished last year. The 1934 report gives a detailed description of the job as well as a cost analysis, from Otter Creek to Killington Avenue parallel to Moon Brook.

This year the remainder of the 60 inch pipe in the deep cut through the Howe Scale dump was put in place and the sewer was entirely in service February 23rd throughout its 8,320 feet of length.

There has been a great improvement in the drainage of the area served by this line. Since its completion there have not been any reported cases of flooding or backing up in its vicinity. Most important of all, there is no sewage emptying into Moon Brook as was formerly the case from the pipe through the Buffum meadow.

The final total construction cost with salvage deducted was \$12.10 per foot of pipe as compared with the estimated cost of \$12.27 per foot. Overhead and operation was higher than estimated because of the high insurance costs of \$3,888.99. Other expenses under this classification were field supervision and inspection—\$550.12; equipment repairs—\$316.45; equipment rentals—\$2,831.83; hand tools—\$572.26; telephone service—\$69.27; new equipment—\$321.69; use of land and damage—\$385.00; engineering—\$188.04; legal fees—\$282.76 and interest on loans—\$464.76.

The net construction cost was \$108,324.43, of which the federal government paid \$32,175.17. The cost to the city, including all overhead, insurance and fees, and with salvage accounted for is \$78,141.67. The cash balance in the Moon Brook Sewer Account December 31st was \$3,599.33.

The wages paid totalled \$67,381.96 which is 61% of the total expended on the project. The largest labor item was excavation, which was done by hand and amounted to \$27,127.81. Pipe laying by hand cost \$13,889.01; backfilling ditch \$8,333.19; disposal of surplus dirt \$1,055.34; pumping and draining ditch water \$3,913.99; and jacking pipe under embankments \$4,714.43.

DOCKET 4841, MUSSEY BROOK SEWER

This trunk line sewer drains the south portion of the city from the junction of Moon Brook Sewer near Forest and Park

Streets to a point on Curtis Avenue east of the Rutland Fire Clay Co. where it receives the sewage flow from the WPA sewer being installed on Curtis Avenue.

This Mussey Brook Sewer consists of 3,050 feet of 42 inch pipe; 1,392 feet of 24 inch pipe; 300 feet of 18 inch pipe and 160 feet of 15 inch. All this was precast reinforced concrete pipe manufactured locally.

The total cost of the project with salvage accounted for was \$47,360.52 which was considerably less than the estimate of \$53,000.00. The government's share of the cost is \$13,675.08 making a net cost to the city of \$33,685.44. The cash on hand of \$683.00 plus the final portion of the Federal Grant, which is \$5,287.73, will leave a balance of \$5,970.73 in the Mussey Brook Account.

The total wages paid were \$25,600.20 which is 56% of the total. Again, hand excavation was the largest item at \$12,595.13; pipe laying cost \$5,080.41; backfill \$6,639.33; disposal of surplus \$554.61 and pumping and drainage \$1,730.72.

The total man hours of labor during the construction period January 7th to September 28th was 46,709. The principal items of material were: concrete pipe, 5,032 feet—\$13,156.64; lumber, nails, etc.—\$758.35; gasoline, kerosene, oil—\$197.33; cement, stone, sand, steel—\$581.12; hand tools—\$342.42; equipment and repairs—\$878.92; equipment rentals—\$1,251.33; compensation insurance—\$1,837.73; miscellaneous supplies \$424.04, and various unclassified items including legal fees, land damages, etc.—\$507.49.

DOCKET 4840, MAIN AREA SEWERS

This project consists of several sections of trunk sewer, each one of which is of enough importance to merit a separate description.

The total cost of all Main Area Sewers, with salvage accounted for after construction was completed, was \$113,792.71. Of this amount, \$70,176.22 or 62% was paid out as wages to laborers. Compensation insurance cost \$4,822.10 which is included in the above total. The Federal share of the cost, of which the final portion will be received in 1936, will be at least \$31,000.00. The cash balance in the account will be a little less than \$1,000.00. There is the possibility that an additional amount of about \$1,200.00 may be receivable from PWA.

The explanation of the work done on each section of this project is as follows:

MAIN AREA No. 1, SECTION A This sewer, from the corner of Church and Williams Streets, extends up Williams, Lincoln Avenue and Melrose Avenue to North Main Street where it takes the flow from North Street Extension and the northeast

corner of the city. This line consists of 692 feet of 45 inch precast reinforced concrete pipe; 972 feet of 42 inch; 372 feet of 30 inch and 380 feet of 36 inch, a total length of 3,592 feet of pipe which cost \$9,128.77 for the pipe only.

The total cost of this Main Area No. 1, Section A, was \$34,826.90, exclusive of overhead and insurance. Of this amount labor totalled \$21,144.17 or 61%. Principal items of material were pipe as shown above, lumber, nails, etc.—\$656.29; gasoline, oil and kerosene—\$168.13; cement, sand, stone—\$432.67; equipment and repairs—\$1,054.45; equipment rentals—\$824.72 and miscellaneous supplies—\$415.99.

MAIN AREA No. 1, SECTION B This is a 27 inch sewer on West Street from Wales to Main, a distance of 1,492 feet which will improve the drainage from the Woodstock Avenue and Bellevue Avenue area. This sewer was under construction from February 1st to April 27th. The total cost was \$11,344.10 of which \$6,900.97, or 61%, was labor. Total man hours worked was 12,544½. Labor subdivision shows that labor cost \$3,800.37 for excavation, \$1,121.90 for disposal of surplus dirt; \$1,304.32 for backfilling ditch and \$674.38 for laying pipe.

Materials, principally pipe, cost \$3,408.83; tools cost \$98.36; rental of equipment was \$315.82 and insurance cost \$472.26.

WEST AREA, SECTION A This sewer unit from Meadow Street to the west side of East Creek on West Street takes the sewage across the creek and into Main Area No. 2 Sewer. The 30 inch reinforced concrete pipe used measured 290 feet in length. An inverted syphon will carry storm water under the river while sanitary flow will pass through a cast iron pipe laid on grade.

WEST AREA, SECTION B From Temple's Crossing to Crampton Avenue on West Street a 15 inch reinforced concrete pipe was laid. This included a jacking job under the three track railroad crossing.

Part of this job was reported in 1934. The final total cost of the work was \$3,243.90, of which \$1,586.66 is shown in the 1934 report.

MAIN AREA No. 2 SEWER This sewer extends from the corner of Meadow and West Streets, up Cleveland Avenue, Crescent Street, Grove Street, along Tenney Brook and up North Street to Pearl Street, a distance of 5,784 feet. This was the last unit of project No. 4840 to be finished, being completed just before the close of the year.

Many unusual construction difficulties and obstacles arose during the PWA program. The greatest departure from conventional methods was the method of placing the sewer pipes under railroad embankments. The process of jacking was perfected and used with great success and the resulting economies

helped to keep the job costs below the estimates. The three sewer projects included nine sections which were jacked into place, seven under railroad embankments and two under highways. Many obstacles, such as ground water, quicksand, ledge rock, buried logs and old timbers, were encountered but all the jacked sections of sewer were successfully completed.

These trunk sewer projects were carried on during the entire winter to relieve unemployment. Ground conditions made work very difficult during the coldest months, but in spite of the increased labor cost at that time, all jobs were finished with cash balances remaining.

The labor used was all local including the manufacturing of the concrete pipe. The number of men averaged about 200 in the city employ alone. All work was finished in less than the estimated time by keeping the largest possible number of men employed at all times.

FEDERAL-AID HIGHWAYS

This division of Federal Relief is administered by the State Highway Department. As was mentioned in the Street Department report there were two projects, one of which will be completed in 1936.

STATE STREET PAVEMENT AND BRIDGE. The local firm of Earle & Merry was awarded this contract by the State Highway Department. The work consisted of replacing the car track area with standard reinforced concrete and concrete widening strips with concrete curbs from Merchants Row to Columbian Avenue, together with a new steel I beam bridge over East Creek. This structure, complete with reinforced concrete roadway deck, sidewalks and concrete handrails and approach guardrails, replaced an old and badly deteriorated steel bridge. The roadway grade was corrected in places resulting in a greatly improved "Gateway" approach to the business district from the west. The cost was \$29,906.86.

MAIN STREET RESURFACING AND CURBS. This work, performed by Colprovia, consisted of placing a two course asphaltic surface, 2¼ inches thick, over the existing concrete pavement. Concrete curbs and gutters were built from Kendall Avenue to Madison Street. For this improvement, Colprovia, Inc. has received \$13,373.47 of Federal funds from the State Highway Department and will complete the work early in 1936.

ENGINEERING DEPARTMENT

The regular city construction, together with the enormous amount of work under the various Federal Relief projects have taxed the facilities of the City engineering staff. The cost to the city must at all times be kept as low as possible under the

restricted city budget. In addition, all the clerical work of the Engineer's Office, preparation of plans, estimates and specifications, cost accounting of every job, surveys, designs, lay-out of work, engineering supervision and inspection must be performed by the same limited personnel.

In spite of the overburden of work, this department has kept all its work up to date and at the same time has maintained a constant check on expenditures to keep all costs within estimates and budget limits.

CONCLUSION

The year 1935 ranks with 1934 for the performance of the largest program of Public Works Construction ever attempted and successfully carried out in this city. The most gratifying feature of the entire program is the fact that all divisions of the Rutland Public Works Department closed the year with small balances in every account. The major trunk sewer accounts will have large balances on hand when all Federal grants of funds are received by the City Treasurer. This will mean a considerable reduction of expense from the estimates which were thought to be very low when made.

While striving to reduce costs on major construction projects and to keep within the departmental budgets for regular City maintenance and improvements, several important improved construction methods and work schedules have been developed. The continued use of these modern methods, which will be available for City Departments, will help to enable the departments to keep within necessarily steadily reduced budget limits during the period of financial stress.

I wish to extend my appreciation to His Honor the Mayor for continuous assistance and cooperation; to the Honorable Board of Aldermen, both as a legislative body and as individuals, and to other City officials and the members of their departments.

The administrative officials of PWA, VERA and WPA and the State Highway Department deserve our thanks for cooperative assistance in carrying out the projects for which their funds have been appropriated for a share of the cost.

The members of the Public Works Department and the workers engaged on the many jobs deserve credit for the successful completion of the program described in this report.

Respectfully submitted,

EDWARD L. TRACY

Commissioner of Public Works

Report of the Commissioner of Public Safety

To the Honorable City Council:

Gentlemen:

I hereby submit my report as Commissioner of Public Safety for the year ending Dec. 31, 1935.

FIRE DEPARTMENT

The Fire Department consists of a Chief Engineer, an Assistant Chief Engineer, two Captains, thirteen Privates, and eight call men.

The apparatus consists of two American LaFrance 750 gallon triple combination trucks, one American LaFrance 75 ft. aerial ladder truck, one American LaFrance combination hose and chemical truck, and one Cadillac service truck.

During the year the Department responded to 339 alarms as follows: Telephone 305, Bell 27, automatic thermostat 5, verbal 2. This is fourteen less than during 1934. The Department also responded to 9 Special Service calls as follows: Remove cats from trees, 6. Shut off ammonia leaks, 2. Broken water pipe, 1.

The value of property involved was \$867,305.00. Insurance carried was \$789,890.00 and insurance paid was \$42,073.84. There was a loss of \$350.00 not insured, making the total loss \$43,423.84. Of this loss \$34,594.00 was in one fire leaving a loss of \$8,829.84 on all of the rest. There were 46 losses paid on fires that the Department was not called to and of which we have no record.

The cost of the Fire Department was \$32,870.97. The inventory value is \$63,816.00.

As a matter of economy in the Fire Department I recommend that the system of paying Call Firemen an annual salary be dispensed with. We now have eight call men drawing a salary of \$95.00 per year each, and many of them scarcely ever attend any fire, neither is it necessary for them to do so, in many cases. For instance; a chimney fire, or a pile of rubbish in someone's back yard way at the far end of the City catches fire and an alarm is sent in. Both companies respond and the blaze is extinguished in a short time. The Department and the equipment are back at the station before the call men have had time to get half way to where the fire was. Why would it not be better to first let the Fire Chief determine the extent of the fire and if he needs them then issue a special alarm for all call men to report immediately at the scene and pay them for the time actually spent? I believe several hundred dollars a year could be saved by such a change.

I also believe, and recommend the salaries for the members of Fire and Police Departments, other than the Chief's should be fixed upon a weekly basis instead of a yearly one as now prevails.

They are paid weekly and why not have their compensation fixed on a weekly basis, then if they are laid off for any reason their pay would cease until they return to work. As it is now their pay goes on whether they work or not unless they are suspended for the breach of some rule of the department. I believe the City has played Santa Claus long enough. It is high time to conduct its business as any well managed corporation or private enterprise does theirs.

POLICE DEPARTMENT

The membership of this department is composed of a Chief of Police; 2 sergeants; 12 patrolmen; 1 on leave of absence; 3 retired on pensions; and 68 special officers.

The total of all arrests made was 226 of which 37 were for breach of peace; 8 driving while drunk; 87 intoxication first offence; 35 second offence; and 10 third offence; 10 violation of auto laws; 4 illegal possession of liquor; 14 larceny.

Automobiles stolen 10, all recovered. Thefts 10. Sixteen places broken into. There were 378 stores and business places found open by patrolmen and prowl car officers which were locked and owners notified. There were 961 cars tagged for parking violations. 61 second offense, paid their fines.

Number of lights found out 33, and there were 2126 persons given lodgings.

Inventory of apparatus and equipment, \$4,220.50.

Appropriation for salaries and expenses \$25,335.00.

Special appropriations and credits, \$861.58.

Making a total of \$26,196.58

Expended for salaries, \$23,191.71. Other expenses, \$2,094.74.

Total, \$25,286.45, leaving a balance (void) of \$798.55, which was made possible by the earnest co-operation of Chief Fox for which I am exceedingly grateful.

Our parking laws were pronounced by the Supreme Court to be null and void, and since that time we have had no parking laws and great inconvenience has been experienced by visitors to our city.

City Attorney Loveland has been working on a set of parking rules that I expect will be ready to present to the Board of Aldermen for its approval very soon. I expect they will be bullet proof.

Respectfully submitted,

MICHAEL F. ROONEY,
Commissioner of Public Safety.

Alfred H. Koltonski
Chief Engineer Fire Department.

Report of City Attorney

To the Honorable City Council:

Gentlemen:

I herewith present to you my report as City Attorney for the portion of the previous year commencing from the date of my appointment, in April, and ending December 31, 1935.

During such period there have been two suits brought, in which the City was named as party defendant, and a considerable number in which the City was made trustee. These actions have all been settled, or otherwise disposed of, without any cost to the City. I do not believe there are any lawsuits pending which will necessitate the appearance of the City Attorney.

Due to the depression, and continued efforts of the Mayor, and other City officials, to reduce expenditures in the care of paupers, there has been a very considerable amount of legal work in the Charities Department. I have been able to assist the Mayor and the Overseer of the Poor in returning and charging many paupers to their proper places of residence, thereby relieving the City of the cost of their support. Approximately eight insane paupers, and one dipsomaniac, were removed to the State Hospital in Waterbury for treatment. By means of an investigation of the bank accounts of all persons aided by the City, I was able to discover and thereafter collect considerable sums of money from persons who fraudulently received aid from the City and who, at the same time, had bank balances. These amounts so collected were turned over to the Overseer of the Poor.

A great variety of legal problems have been submitted for my opinion by the Mayor, Aldermen and other City officials, some of which necessitated a good deal of study and investigation. The activities of the various Federal Relief Agencies in their various projects, and in the dispensing of Federal Funds to the Municipality and individuals, have required almost constant legal attention. There have been several intricate and important questions to be answered in regard to Municipal finances.

A number of Ordinances have been changed, amended, or inserted. Due to the recent Supreme Court decision in the Noyes case, the entire Traffic Ordinance of this City has been revised and will shortly be submitted to the City Council.

I have been constantly assisting the City Constable in the collection of taxes, both by means of letters, consultations and suits and we have been very fortunate in securing several thousand dollars in delinquent taxes. Many collections are now pending and partial payments are being made thereon.

No salary or fees have been incurred or requested by me beyond the amount previously specified by the City Council.

Although the legal business of this City is considerable, yet, it is all of a very pleasant nature, due to the intelligent and friendly co-operation of the various City officials. In closing I wish particularly to acknowledge my gratitude to Mayor Branchaud, the various members of the Board of Aldermen, the City Treasurer and City Clerk for the suggestions, the time, and never failing courtesy which I have invariably received from them.

Respectfully submitted,

VERNON LOVELAND,
City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

------------	------------

Due to the large number of families applying to the City for help, an increase of 106 families over last year, Mayor Branchaud found it necessary to establish an office in the City Hall. A filing system has been developed by which each request for help could be thoroughly investigated before giving assistance. This investigation became more necessary upon discovering several families who had bank accounts and who were receiving aid from the City. After carefully checking this situation, City Attorney Loveland and myself obtained for the City a refund of several hundred dollars from these families, one family refunding to the amount of \$325. This examination also exposed several families not legal residents who were receiving City aid. The bills for the assistance to them are now being collected from the town from which they come.

The City Farm is being efficiently managed under the supervision of Mr. and Mrs. Louis Gould. 48 inmates are being cared for at the farm. An Inventory of livestock, farming implements, household furnishings, etc. at the farm amounts to \$5,163.35. A total of 1580 transients were accommodated at the farm during the year 1935. Owing to the many individuals boarding outside the farm it is very evident that an addition to the farm house is badly needed, by which 40 to 50 people could be cared for. The money saved in caring for these people at the farm would pay the expense of the annex in a short period of time.

An item which has saved the City several hundred dollars is the cutting and drawing of 1500 cords of stove wood since September 1st, to the present time, from the city wood lot in Mendon to the City Farm where it is sawed and used to fill orders for wood for the needy. These orders are delivered by the City truck thus reducing the fuel bill. I would suggest that a large wood shed be erected to shelter the wood. This building could be erected for a small expenditure with the aid of the labor of the inmates residing at the farm.

An important step taken is the distributing of milk to the needy families by a system of milk tickets. Families apply each week at the Overseer's office and receive their certain allotment of milk tickets. The orders for milk are distributed among six milk dealers. Notwithstanding the special rate of \$.08 per quart a sum of about \$800 is expended monthly in furnishing milk to the needy.

The item of Doctors' bills showing the expenditure of several thousand dollars included not only medical care for the current year, but the payment of outstanding doctors' bills since the year 1922. This action was made possible through the splendid co-operation of Mayor Branchaud and the Board of Aldermen.

An added burden to the City Charity Department is the distributing of Government commodities including meat, milk and prunes to the needy. A certain day in the week is set aside for the giving out of these articles. An average of about 1600 cans of milk, 2376 cans of meat and 1452 pounds of prunes is given out monthly.

In closing may I say that it has been a very difficult and trying term for those employed in the City Charity Department, and I want to take this opportunity to thank Mayor Branchaud for his valuable assistance, the Board of Aldermen for their kind co-operation, the City officials for their liberal aid, and all those connected with the Charity Department, as their assistance has enabled me to help all deserving cases with proper and human care, ever mindful of my aim to keep the costs of the taxpayer at a minimum.

Respectfully submitted,

JOHN D. HAUGH,
Overseer of Poor.

Report of the District Nurse

To the Honorable City Council:

I hereby submit the following report for the year ending December 31, 1935.

The thought and aim of members of the Rutland Missionary Society, who are the sponsors of the district nursing service of this city, is the care of the sick, looking after the welfare of the aged and infirm, and in care of small children in the homes of the poor and those on relief projects. In carrying out these aims, and in doing these duties the nurse has been on call every day the entire year.

The sick visits have numbered 1932, the welfare calls 227. I have cared for 26 maternity cases and made 107 prenatal visits to expectant mothers.

During the first half of the year a sewing project under the VERA was carried on, in which infants' clothes were made from Federal material. 62 layettes were made up and sent to mothers who asked for them. This was done from Red Cross headquarters, as they had charge of the sewing project.

During the year, those interested in welfare work have given money and clothing to be used where and when needed in emergency cases. With the money given, medicines and toilet articles have been furnished in 43 families. Clothing, bedding, shoes, milk, fruit, eggs, have gone into 37 homes, and 54 pair of knitted mittens have been given out. Aid and co-operation was given at Thanksgiving and Christmas seasons in the various projects.

For several years past, the nurse has had the supervision of the rest rooms for mothers with small children at the Fair Grounds during the first week of September. This custom was carried out again this year.

The churches and kindred organizations have continued their interest and financial support through the year, and the Ward Bus Co. have furnished free transportation on all their lines. This interest and co-operation has been appreciated and I have tried to perform my duties as unto God and not for praise of men.

The expense of the year has been as follows:

Salaries for nurses \$1,207.00

This was met by the City appropriation of \$300, the annual ward canvass of \$423 and patients' fees of \$64, the balance of \$426 being paid by the sponsors, the Rutland Missionary Society.

Respectfully submitted,

LUCIE P. CLARK
District Nurse.

Report of Health Officer

To the Honorable City Council, Rutland, Vermont:

Gentlemen:

I herewith submit my report for the year ending Dec. 31, 1935.

Communicable diseases reported were as follows:

Chicken-pox	221
German Measles	322
Scarlet Fever	61
Whooping Cough	55
Mumps	18
Measles	13
Typhoid Fever	2
Diphtheria	1
Total	693

The two cases of typhoid fever were from neighboring towns and were reported from the hospital. Scarlet fever was prevalent throughout the country, and is being studied by the various scientific agencies as both a health and economic problem.

Samples of water were submitted daily to the Department of Hygiene at Burlington for examination and the report of these tests show the usual standard of city water. Inspections were frequently made at the reservoir and at homes and camps along the water shed. The reservoir was cleaned by the Water Department on May 11th, and it has proven that cleaning, at this season, eliminates odor and weed growth. Samples of water from the swimming pool, while in operation, were tested daily by the Department of Hygiene and reports on file at this office show that sanitary conditions were maintained by the careful supervision of the manager.

Sanitary inspections in the city which include hotels, restaurants, soda fountains, etc. 640. Owing to a ruling of the Liquor Control Board, certificates of inspections were filed with said board prior to licensing. All of these establishments are classed as restaurants. Restaurant licenses issued by the city the past year number 75, it is therefore obvious that frequent inspections of eating places are impossible. Many complaints are received owing to the promiscuous dumping of garbage and rubbish in certain localities. We believe the condition to be serious enough to warrant a more efficient method of collection and disposal.

All of the school buildings were inspected and fire drills were given by Chief Koltonski of the Fire Department. 194 pupils of the Public and Parochial schools were immunized against diphtheria at a cost to the city of \$111.20.

In conclusion I wish to express my appreciation to the various departments for their co-operation and support and to the consideration shown by the Board of Health, during the year.

Respectfully submitted,

CLARE M. COLE,
Health Officer.

Report of Milk Inspector

To the Honorable City Council, Rutland, Vermont:

Gentlemen:

I herewith submit my report as Milk Inspector for the year ending December 31, 1935.

Total number of dairy and creamery inspections, 872. Two dairies were excluded because of unsanitary conditions. It is interesting to note that with few exceptions, the local Milk Inspection Ordinance follows the 1935 Public Health Service Milk Inspection Ordinance.

Tests for mastitis were necessary at intervals and many cows were excluded from the milk supply. Sediment and lactometer tests were made at intervals and temperature tests were frequently taken during the Summer season. Nearly all dairy plants are now equipped with adequate cooling systems.

The State and Federal Governments are testing several dairies for Bang's disease, and milk from these herds will soon be available as well as from TB tested herds. As a result of State law requiring a State license from distributors who buy 250 quarts of milk per day, 5 distributors affecting 33 dairies are listed under State Licensed Creameries.

Total number of samples of milk and cream submitted to the State Department of Hygiene for examination 679. The result of these tests were published monthly in the Rutland Herald and in comparison show a marked improvement in the quality of milk sold in the city.

The following licenses were issued:

Creameries	3
Distributors	15
Wholesalers	2
Producers	73
Retailers	145
<hr/>	
Total	238

The sum of Five Hundred Thirty-four Dollars (\$534.00) was turned over to the City Clerk.

We wish to gratefully acknowledge the courtesy and co-operation of Mr. H. E. Bremer, State Supervisor of Creamery Inspection and Mr. R. A. Knowlton, State Inspector of this area, for their aid in our dairy and creamery work.

Respectfully submitted,

CLARE M. COLE,
Milk Inspector.

Report of Department of Public Health

Statistics for 1935 compiled from certificates filed in the City Clerk's office.

Report of Swimming Pool Manager

To the Honorable City Council:

I herewith submit my report as Manager of the Municipal Swimming Pool for the year ending December 31, 1935.

RECEIPTS

154 Children's season tickets at \$2.00.	\$308 00
18 Children's season tickets at \$1.00	18 00
11 Student tickets at \$2.50	27 50
27 Special Adult tickets at \$1.00	27 00
1 Adult ticket at \$5.00	5 00
5 Family tickets at \$8.00	40 00
616 Adult admissions at .25	154 00
8204 Children's admissions at .10	820 40
2100 Children's admissions at .05	105 00
240 Towels at .05	12 00
Concession	60 00
Total Receipts	\$1,576 90

EXPENDITURES

Payrolls	\$776 02
New equipment, buoys, diving board, etc.	69 83
Repairs and upkeep, paint, lumber, cement, etc.	102 98
Sterilization supplies, lime, vitrol, chlorine, etc.	39 67
Light and power	30 56
Bus service	85 00
Postage on water samples	6 75
Laundry, towels, blankets, etc.	5 83
Supplies, tickets, first aid, etc.	8 15
Prizes	20 16
Freight and express	8 95
Transferred to general account	30 13
Total	\$1,184 03
Total receipts	\$1,576 90
Total expenditures	1,184 03
Total profit	\$392 87
1934 profit	\$125 93
1935 profit	392 87
Balance on hand	\$518 80

ATTENDANCE

Paid admissions	10,956
Ticket admissions	12,900
Free admissions	7,770
Total	31,626

The Swimming Pool fund now has a balance of \$518.80. This money will be used as a sinking fund, to be used for necessary repairs or replacements. It is desired to keep the pool self-supporting, and not an expense to the taxpayers.

During the Spring of 1935 the WPA Painters gave the pool bowl two coats of white paint.

Upon the recommendation of Albert Gray, National Field Representative of the American Red Cross, one life guard was added to the staff, and two buoys and racks to the equipment. These additions rated the pool "Class A" in the American Red Cross Water Safety Classification.

Free bus service was given twice weekly and the bus was crowded every trip.

Classes in swimming and life saving were well attended, and the results obtained most satisfactory. The pool had the largest attendance this season of any season since the pool was opened.

I wish to express my appreciation to His Honor the Mayor, the Board of Aldermen, the Recreation Committee, the various City Departments, and to the Pool Staff, whose close cooperation I have had at all times.

Respectfully submitted,

JOSEPH BRISLIN
Manager.

Report of Inspector of Buildings

To the Honorable City Council:

I herewith submit the following report for the year ending December 31, 1935.

New Houses.....	22
House Additions.....	10
House Remodeling.....	2

MARGARET R. FERGUSON,
Treasurer.

I have examined the above accounts and find them correct
as stated.

CORNELIA C. PERKINS,
Auditor.

Report of the Board of School Commissioners

To the Mayor, Board of Aldermen and Citizens of the City of Rutland:

The Board of School Commissioners, acting for the people of Rutland, is concerned with three major problems: securing and retaining high grade teachers; caring for and improving school buildings, grounds and equipment; and securing the money necessary to make the other two objectives possible.

TEACHERS

We desire above all things to arrange affairs so that the teaching service furnished for the children of Rutland will grow constantly better. In making this statement we do not wish to be understood as implying that the teachers of the present and past have not rendered excellent service. The teachers of Rutland are an estimable body of devoted and capable public servants. They have embraced every opportunity for professional improvement and have worked diligently to improve their service to our children. But as life becomes more complicated and the potentialities of children are more clearly recognized, teacher selection and preparation becomes a more exacting task.

No matter how well an institution has served the people, the demands of a changing social order force us to plan for improvement. In spite of the excellence of our teachers of the past and present we must plan for better teachers in the future. With this implied demand in mind we have made the minimum requirement, for new teachers coming into the system, a three year preparation instead of a two year preparation.

Some teachers are able to continue to render good service in the schools for a time after the age of three score years and ten but by and large the schools are better served by having an age limit for teachers. Acting on this principle we have adopted a rule that after July 1, 1938 teachers who have reached the age of seventy shall retire from active service. Fortunately the teachers' retirement system established by the state about seventeen years ago makes it possible for the older teachers to retire without fear of loss of economic independence.

BUILDINGS, GROUNDS AND EQUIPMENT

The sound value of school buildings, grounds and equipment in Rutland at the present time is in round numbers one million dollars. The care of this plant requires planning and a yearly outlay of considerable money. One percent of present value, or ten thousand dollars a year, would be a reasonable

expenditure for this purpose but our present budget limitation will not permit an expenditure as large as this.

Our building committee has recommended and we have adopted a five-year plan calling for an average yearly expenditure of \$7,550. The plan includes not only the regular repairs and minor improvements to buildings and grounds but includes also the gradual replacement of obsolete equipment which is expensive to repair and unsatisfactory to use.

We have been able to improve extensively the grounds at the Park Street, Lincoln and Dana Schools because these projects were approved for Federal aid. We hope to continue this program next spring by improving the grounds at the Watkins Avenue and Meldon Schools. The plan for building walks and curbs at six schools failed of approval in 1935 until it was too late for such work but the outlook for progress on this improvement in 1936 is bright.

FINANCIAL

The members of your school board are taxpayers and for the most part now have or have had children in the schools. We are, therefore, interested in sound economy in the management of the schools and in any move to make them better for the children. We are not interested in change for the sake of change, but we are interested in every improvement which we can afford. You may be very sure that any move to increase the cost of public education has been considered from every angle and has been adopted because the welfare of our children demanded it.

In order to balance our budget and to meet the demands of the times the teachers and others were given a ten percent cut in salary in 1932 and another ten percent cut in 1933. Beginning with January 1936 we have made an adjustment in salaries so that they will be fifteen percent below normal. Your board believes that salaries ought to be restored to the level of 1932 in the near future and that gradual improvement should be made in the salary schedule.

Many of the best teachers tend to gravitate to the centers that pay the highest salaries. Our salary schedule has been lower for some time than that maintained in several of the leading communities of Vermont. We believe that the children of Rutland deserve the best the state has to offer in the way of teaching service so we are much concerned about a larger income for the schools in the near future in order that we may secure and retain the best possible teachers.

It will cost about twenty thousand dollars a year to restore salaries to the normal level of 1932. It will cost another twenty thousand dollars to improve our salary schedule so that we will be competing on equal terms for good teachers with the other leading

centers of population in Vermont and to make a few improvements in the offering of the schools.

We believe that a considerable portion of this additional forty thousand dollars should come from the state. The state should assume a larger share of the cost of education because its interest in the welfare of all the citizens is as great as that of the communities. The state, because of its superior taxing power, can levy a tax on wealth in any form while the towns are limited to raising a tax on real property which is already overtaxed. We think, therefore, that our efforts should be to influence the state to do its part. In the meantime it will be necessary for us to increase our local tax or the education offered the children of Rutland will be inferior to that offered in the better communities of the state.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS

By Joseph F. Cronan, *President*

Rutland, Vermont, February 3, 1936.

Report of the Superintendent of Schools

To the Board of School Commissioners, the Mayor, the Board of Aldermen and the Citizens of the City of Rutland:

I have the honor of submitting to you the forty-third annual report of the Rutland Public Schools and the fifteenth under the present administration.

The growth of free public education in the United States has been one of the most amazing developments of our history. The high school, which secured a firm hold on the imagination of the American people in the latter part of the nineteenth century, shows this growth in spectacular manner, having increased in enrollment from three hundred thousand in 1890 to seven million today. The log school houses of an earlier day have been replaced by a school plant which represents a capital outlay in the United States today of about eight billions of dollars. The limited teaching force for a few small groups of children has grown into an army of a million teachers and other workers who minister to the needs of nearly thirty million children and youth.

In Rutland it costs thirty-five cents a day for each child in school. The children are provided with a comfortable, clean, well kept building and instruction which will develop character, promote culture, and improve citizenship, for the sum of seven cents an hour. The contention might be made that the schools are worth more than they cost if they did nothing more than provide a place of meeting under leadership which promotes sane living. The mothers might easily maintain that it was worth more than thirty-five cents to be relieved of the responsibility of supervising their children for six hours a day. They have discovered that it costs more to hire someone to look after a child for two or three hours in the evening than to keep him in school all day.

Since the average number of pupils per teacher is twenty-eight in the high school, thirty-one in Meldon school, and thirty-four in the elementary schools, instruction must of necessity be on a wholesale basis. In spite of the numbers involved, however, considerable progress has been made in meeting the individual needs of our school population of twenty-five hundred children. It would be impossible, in a brief report, to describe in detail the steps taken to make education more of a personal matter but a few parts of the school program can be presented to show how different levels of ability are utilized.

The ungraded class established sixteen years ago and the opportunity class organized thirteen years ago provide places

for those children whose academic pace is decidedly different from that of the average child. By placing these children in classes by themselves we do them a great service and improve the chances of the normal child to complete a year's work in a year. The main reason for separating these children from the others is to make it possible to cover school work at a rate which is in harmony with the child's capacity. It is also possible to emphasize certain fundamental life considerations which will tend in later life to make self-supporting and self-respecting citizens. Happiness, good will, co-operation, courtesy, and citizenship are the outcomes especially sought in these groups.

For some years we have grouped the children in grades seven to ten in such a way that each individual in a class will be able to travel at about the same rate of speed. This plan allows the child who develops at a slower rate to work with those of his speed and thus prevent the discouragement which comes from always being behind. On the other hand those who can travel at a higher rate of speed are stimulated by being with those who can proceed equally fast. Much of the literature, for instance, enjoyed by one group cannot be understood or appreciated by the other. Moreover, we tend to lessen one of the greatest evils of mass instruction—that of reducing really talented children to the level of average mediocrity.

The school patrol at the Longfellow School, organized and promoted by Principal Margaret Hoyt with some assistance from the American Automobile Association and the Motor Vehicle Department of the State of Vermont, has proved to be an activity of exceptional merit for training in safety education and in character development. Many people have observed and commented upon the service rendered by these boys in making street crossing safe for children and peace of mind possible for the motorist. It is perfectly clear that the children are protected, but the effect on the boys in the patrol is not so obvious. They are learning to accept responsibility and to stick to their post of duty regardless of personal desires. They must conduct themselves in an honorable manner or be demoted, which has come to be a serious matter with the boys.

In the two upper schools it is possible to make better provision for individual differences because a much greater variety of subjects is offered for study and because a large number of other activities is available in which our youth may develop.

The Red and White, the school paper published every week by the students of Rutland High School, is a very creditable production. It is no small matter for a group of high school students to get out any kind of paper every week, but when they produce a paper which can win first or second place in a national competition for five years in succession, they have made an achievement worth more notice from the public than it receives.

Some thirty or more children get special and invaluable training each year in this enterprise.

We do not forget that many young people as soon as they graduate from high school will need to earn a living. With this in mind the high school principal and the head of the commercial department have established a personnel department. This move will serve the public as well as the graduates because every effort will be made to fit the right student to the right job and eliminate the embarrassment which always follows when square pegs are put into round holes. In determining the personal qualities of a pupil, consideration is given to such qualities as reliability, co-operation, self-reliance and courtesy. Some pupils are notoriously deficient in arithmetic, or spelling, or personality, making it futile to recommend them for certain types of work, but other good qualities would make them a success in another job.

School people and many others have recognized for several years the necessity of developing a more effective guidance program for the youth of our city. The misfits in life are so numerous that nearly everyone recognizes the necessity of careful thinking and planning on the part of each individual before he chooses his life work. Our chief difficulty at the present time is to find a person with time and talent for this type of work. The leader in a guidance program ought to be a person of considerable maturity who has had actual contact with the industrial and professional world. Such a leader needs special training in the mental and emotional life of human beings and a broad cultural education.

Any guidance program worthy of consideration will include means for promoting mental health and instruction in mental hygiene. It is said that one-half of all the hospital beds in the United States are filled by people with a mental or an emotional upset. Half of these patients would not need hospitalization if their emotional eccentricities had been understood and principles of mental hygiene applied when they were children. The mental and emotional life of children should receive far more consideration than is the case at the present time.

In spite of all that can be done to guide, instruct, and aid the children of a community, the final choice rests with the individual pupil. Some really talented children do not succeed very well in school because they do not choose to do so. The best we can do is to create the most favorable conditions possible and use every effort to stimulate the child to do his best. It is still true that a child who is determined to do well in school and in life will do just that in spite of the tag the school or society puts on him.

The conditions for the education of the young people of Rutland are very favorable. The schools enjoy the confidence

and esteem of the public and there is a spirit of co-operation and good will among school people both public and parochial. The blazé, sophisticated youth of a few years ago is not so much in evidence but his place has been taken by one who recognizes that scholarship and diligent effort count for much in life.

The forces of education cannot stand still. The growth and development of all the generations since the white man landed in America must be continued. The schools of Rutland need better financial support, a public that is convinced of the importance of the teacher in our social scheme, and a conviction that democracy cannot endure unless education improves and advances. We need teachers who are worth much more than they will ever get but choose teaching because it gives them social prestige and the satisfaction of dealing with the best people in America, the children.

Respectfully submitted,

WILLIAM W. FAIRCHILD,
Superintendent of Schools.

Rutland, Vermont, February 3, 1936.

Statistical Report of the Rutland Public Schools

RUTLAND PUBLIC SCHOOLS FINANCIAL STATEMENT FOR FISCAL YEAR ENDING DECEMBER 31, 1935

RECEIPTS

Balance January 1, 1935, deferred payments on teachers' salaries	\$6,616 99
City appropriation at \$1.10 on Grand List of \$129,192.15.....	142,111 36
State support.....	3,857 77
State aid vocational courses.....	380 24
Tuition.....	9,462 20
Text books sold.....	2,672 33
Incidentals—Rentals \$620; return of revolving funds provided at the beginning of each fiscal year for petty cash account and home economics supplies \$200; sale of lumber in manual training department \$219.39; refund on nursery lunches \$832.79; other \$264.08.....	2,136 26
Total receipts.....	\$167,237 15

DISBURSEMENTS

Report of Auditors

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, City Constable and Sinking Fund Commissioners, from January 1, 1935 to December 31, 1935, inclusive, and we hereby certify that IN OUR OPINION, they have duly accounted for all monies received by them.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the books of the City Treasurer. We have checked the cash and verified the bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners and found them to be correct.

The books of the City Treasurer are in their usual excellent condition and very clearly show the city's true financial condition on December 31, 1935, and the result of operations for the twelve months period then ended.

Respectfully submitted,

GEO. A. SABIN,
JOHN W. BURKE,
ARTHUR E. CROWLEY
Auditors.
